

Description

For over 60 years, FlightSafety has been providing the best instructor-led training in the industry. Now for the first time, our instructor-led training is available via LiveLearning®: live over-the-web training! LiveLearning offers you the benefit of live interaction with our knowledgeable instructors but the convenience of training from any computer with an internet connection. You simply log on at a set date and time to complete your training.

Features and Benefits

- Direct access to FlightSafety's best and most knowledgeable instructors
- Real-time interaction with the instructor and peers
- Use online annotation tools to illustrate what you are saying
- Available anywhere via the internet
- Save time and money by completing your training online
- Minimal equipment required

LiveLearning Video

LiveLearning Courses Available

ALAR/CFIT - \$300 USD

Learn how to protect yourself from Approach and Landing Accident Reduction and Controlled Flight Into Terrain (ALAR/CFIT) accidents. Whether you've been flying for years or are relatively new to aviation, ALAR/CFIT training is a necessity in safe aircraft operation.

*Available in Spanish upon request

LiveLearning Courses (cont'd)

Automation Management - \$285 USD

Learn how and why aviation automated systems developed, examine the benefits and challenges associated with them, and learn some usage and CRM "tools" to allow more effective and safer management of their aircraft.

Cold Weather Operations - \$315 USD

Flight Safety's Cold Weather Operations course explores aviation accidents attributed to inadequate pre-takeoff inspections, inadequate de-icing and anti-icing procedures, and insufficient awareness of in-flight icing hazards. This two-hour course is the most comprehensive online training on cold weather hazards for flight department personnel.

CRM 2.0 - \$325 USD

Based on an actual event, this two hour course places you in the captain's seat as you utilize the principles of crew resource management to make decisions and maintain situational awareness while fighting the effects of stress and fatigue.

Warm Weather Operations - \$300 USD

Gain a better understanding of meteorology and will be better equipped to make safety decisions during hail, lightning, high and low altitude turbulence, low level windshear, strong surface crosswinds, and heavy rain.

Upcoming Courses

- EGPWS/TAWS
- Fatigue Management
- TCAS
- Weather Radar
- RVSM
- High Altitude Training

Delivery

Led by a live instructor over the web

How to Purchase

For more information or to enroll in LiveLearning, please visit our LiveLearning website: www.flightsafety.com/livelearning

For flight departments or group enrollments, please contact eLearning Operations at: eLearningSupport@flightsafety.com

About eLearning

We deliver web-based courses that are entirely self-paced. Log on whenever and as often as needed until you complete the course.

Our LiveLearning courses are web-based and instructor-led, providing all the benefits of being in the classroom, without ever having to leave the comfort of your home.

Our Learning Management System records your progress and keeps track of your LiveLearning bookings. Once you've completed a course and successfully passed the test, you are awarded a certificate of completion. You can access and print your eLearning Records of Training through myFlightSafety.com.

Tracking by Chief Pilot or DOM

Upon request, we can email weekly progress reports to the administrator of any account.

Technical Support

FlightSafety eLearning technical support analysts are available by telephone during normal business hours and via e-mail after hours.

Computer System Requirements

- Display setting of 1024x768 or greater
- Sound card with speakers or headset
- Flash v9.0+
- Internet Explorer 6+ or Mozilla Firefox 1.5+

To test and install the WebEx client, please go to: <http://www.webex.com/lp/jointest/>

ThinkSafety®

FlightSafety International is the world's premier professional aviation training company and supplier of flight simulators, visual systems and displays to commercial, government and military organizations. Our company provides more than a million hours of training each year to pilots, technicians and other aviation professionals from 154 countries and independent territories. FlightSafety operates the world's largest fleet of advanced full flight simulators at Learning Centers and training locations in Asia, Europe, North and South America, the Pacific Rim, South Africa, and the United Kingdom.
