

Description

Patient safety, like aviation safety, is a complex interaction of systems, human factors, and technology. The aviation and medical fields know that without a continuous effort and focus on safety, highly preventable mistakes can easily go unnoticed.

Air Medical Resource Management (AMRM), conceived from the roots of Crew Resource Management (CRM), encompasses both flight safety and patient safety.

During this course, you will take an in-depth look at the job of the flight crew, maintenance engineer, dispatcher, paramedics and/or flight nurses and explore the dynamics created as two complex industries, aviation and medicine, are brought together. This course is essential for anyone working as a crewmember in the air ambulance profession.

Features and Benefits

- Explore the highly complex dynamic created when the medical and aviation professions are brought together
- Learn how to mitigate threats and manage errors present in Air Medical Operations
- As air medical crew members, learn how to effectively and safely use all available resources
- Designed for air medical professionals to meet CAMTS requirements and FAA AMRM guidelines

Target Audience

Air Medical flight crew, maintenance, dispatchers, paramedics, and flight nurses

Course Objectives

This course is designed to enhance the air medical industry's safety culture by promoting group cohesiveness and adaptation during change. The training focuses on the human element of the job and the managing of all available resources so as to operate safely. The course covers the following topics:

- Introduction
- Threat and Error Management
- Human Factors
- Personality Types
- Air Medical Crews and Group Dynamics
- Flight Psychology
- Flight Physiology
- Fatigue
- Stress
- Resource Management
- Standard Operating Procedures
- Checklists
- Automation

Regulatory Requirements

Designed to meet CAMTS requirements. When approved by a POI, it will satisfy guidelines set by FAA Advisory Circular 00-64: Air Medical Resource Management

Price

\$225 USD/person

Duration

1.5 hours

Delivery

100% web-delivered and self-paced

Credit

Once you have completed the course, you are awarded a FlightSafety International certificate of completion. If you are an existing FlightSafety customer, you can also pick up your record of training in myFlightSafety.

About eLearning

We deliver web-based eLearning courses that are entirely self-paced. Log on whenever and as often as needed until you complete the course.

Our Learning Management System records your progress and keeps track of your online training. Once you've completed a course and successfully passed the test, you are awarded a certificate of completion. You can access and print your eLearning Records of Training through myFlightSafety.com.

Tracking by Chief Pilot or DOM

Upon request, we can email weekly progress reports to the administrator of any account.

Technical Support

FlightSafety eLearning technical support analysts are available by telephone during normal business hours and via e-mail after hours.

Computer System Requirements

- Display setting of 1024x768 or greater
- Sound card with speakers or headset
- Flash v9.0+
- Internet Explorer 6+ or Mozilla Firefox 1.5+

Our system will perform a quick test on your configuration, and guide you through any downloads you may need.

ThinkSafety.

FlightSafety International is the world's premier professional aviation training company and supplier of flight simulators, visual systems and displays to commercial, government and military organizations. Our company provides more than a million hours of training each year to pilots, technicians and other aviation professionals from 154 countries and independent territories. FlightSafety operates the world's largest fleet of advanced full flight simulators at Learning Centers and training locations in Asia, Europe, North and South America, the Pacific Rim, South Africa and the United Kingdom.
