

MasterTechnician

FLIGHT SAFETY

Master Technician – Engine

You've worked hard to gain the knowledge and skills you need to be a valued member of your flight department. Take the next step with this FlightSafety training program, designed for the maintenance professional who wants to do more and achieve more. Based on our popular Master Technician training program, Engine training builds on your proven technical abilities with training in skills that would otherwise take years to acquire – making you even more of an asset to your organization.

Five Steps to a More Promising Career

Our progressive curriculum follows a five-step process ensuring you receive instruction on all the skills necessary to become a Master Technician with an Engine focus. To earn the Master Technician – Engine certificate, complete four mandatory core courses, then choose one course from a list of six.

High Standards

A knowledgeable, motivated technician benefits all aspects of your operation.

- Improved safety
- Lower operational costs
- Increased aircraft dispatch reliability

Benefits

Join the elite group of Master Technicians, now numbering in the thousands worldwide. Here are a few of the benefits.

- Industry, employer/employee and peer recognition
- Technical expertise; professional/personal development
- Greater asset to your maintenance department
- Ability to respond to the growing number of employment ads that specify a Master Technician
- Continue your Master Technician path with additional certificates

Multiple Master Technician Certificates

Once you've earned a Master Technician certificate, you can continue to expand both your skill sets and your career possibilities with additional Master Technician certificates.

Mandatory

All candidates for Master Technician – Engine must complete the following:

- Line and Base Engine-Specific Course
- Hot Section Inspection (HSI) Training Course
- WebECTM/Engine Condition Trend Monitoring
- Engine-Specific Operational Maintenance Procedures
