## Master Technician – Management

You've worked hard to gain the knowledge and skills you need to be a valued member of your flight department. Take the next step with this FlightSafety training program, designed to help advance your career. Built on our popular Master Technician training program, Management training provides you with the skills you need to interact effectively with customers, managers and co-workers, preparing you for additional responsibilities or a management position.

### Five Steps to a More Promising Career

Our progressive curriculum follows a five-step process ensuring that you receive instruction on all the skills necessary to become a Master Technician with a Management focus. To earn your Master Technician – Management medallion and certificate, complete two mandatory core courses, then choose any three courses from a list of nine.

### High Standards

A knowledgeable, motivated technician benefits all aspects of your operation.

- Improved safety
- Lower operational costs
- Increased aircraft dispatch reliability

### Benefits

Join the elite group of Master Technicians, now numbering in the thousands worldwide. Here are a few of the benefits.

- Industry, employer/employee and peer recognition
- Technical expertise; professional/personal development
- Greater asset to your maintenance department
- Ability to respond to the growing number of employment ads that specify a Master Technician
- Continue your Master Technician path with additional certificates

### Multiple Master Technician Certificates

Once you've earned a Master Technician certificate, you can continue to expand both your skill sets and your career possibilities with additional Master Technician certificates.

### Mandatory

All candidates for Master Technician – Management must complete the following:

- Aviation Interpersonal Maintenance Management (GJS)
- Aircraft-Specific Initial, Familiarization or Update Course

### Electives

Choose any three of these courses.

- FARs for AMTs
- FAR Part 145 Repair Station Training
- Human Factors
- Maintenance Resource Management (MRM)
- Other Generic/eLearning Courses
- OSHA/EPA Training
- RVSM (1- or 2-Day)
- Safety Management Systems (SMS)
- Project Management for the Aviation Professional

### Additional Master Technician Programs

- Avionics: Aircraft-specific
- Engine: In-depth, Engine-specific
- Mechanical Airframe: Aircraft-specific
