

FlightSafety Textron Aviation

TRAINING

Companion Course

Course Information

Designed for non-pilot passengers, the Companion Course is focused on giving the right seat passenger information that will help them practice landing the aircraft in the case of an incapacitated pilot. This course covers fundamentals of flight, flight instruments, communication radio usage, transponder, and autopilot basic operation. Ultimately, it is designed for a spouse, child, or business partner to build confidence in the ability to land a private aircraft if the pilot should become incapacitated. We highly recommend that this course be conducted in a simulator of the same type aircraft that is normally flown. Also, to ensure the best experience, only the non-pilot/passenger and instructor will be in the simulator.

Curriculum

| Module | 1 Day |
|---------------|-----------|
| Ground School | 4.0 hours |
| Simulator* | 2.0 hours |
| De-Briefing | 0.5 hours |

* Additional Simulator time is available and will be billed at an hourly rate

Available Aircraft Models and Locations

| Aircraft Model | Locations |
|--------------------|--|
| Citation Mustang | Orlando, FL, and Wichita East, KS |
| Citation CJ1 | San Antonio, TX |
| Citation CJ2+ | San Antonio, TX |
| Citation CJ2 | Orlando, FL |
| Citation CJ3 | Carlsbad, CA, Orlando, FL, Tampa, FL, and Wichita Cessna, KS |
| Citation CJ4 | Carlsbad, CA, and Orlando, FL |
| Citation M2 / CJ3+ | Tampa, FL, and Wichita East, KS |

Ground School – Includes cockpit orientation, flight instruments, fundamentals of control, radio, autopilot, and avionics usage. A briefing of the flight will be conducted in the ground school.

Simulator – Includes approach to landing practice with the non-pilot/passenger in the right seat.

Course Dates – For course dates, please visit our website at www.flightsafetytextronaviationtraining.com or contact one of the Learning Centers listed below.
